Dear Jennifer Borg, Esq., et al.

Please see the attached demand letter for correction of the publication "Report 15-01: Does An OPRA Request Constitute Harassment?", authored by your staff, and listed on your website and accomplishments page separately for the past decade.

Your publication has factual errors, incomplete context, and instances of editorialization with no opportunity for response, which together, have played a key part in your board member Charlie Kratovil's ongoing domestic violence towards me, which he accomplishes by using your report to "prove" he is "innocent", and then telling his followers that I am "evil" for "making it up", which predictably incites violent threats and behavior towards me.

In the attachment, I lay out what is materially wrong with the report, the evidence to support my claims, as well as what I am asking you to do as a result, which quite reasonably, at this time is limited to issuing a correction with the updated factual information.

Thank you for your diligence and ethical impartiality in reviewing these facts as you determine the most responsible course of action for NJFOG and its important mission of transparency.

While my attached letter may seem stark, I do not want you to think of me as inherently opposed to your mission. Indeed, as you read through the facts, and the position I'm taking by asking for more disclosure, not less, hopefully you will come to see me in a different light than that which is apparent in the article in question. Please do the right thing here. I know it can be hard to admit when we've made mistakes or that someone we've supported has issues that need to be addressed, but I'm counting on your review of the facts and your commitment to truth and transparency in reporting to fix this very real harm that I am facing involving very minimal action on your part.

All this aside, please enjoy the great weather today, and should you have any questions or wish to speak again, please don't hesitate to respond here and we will be happy to set something up.

Best Wishes,

Ashley Kaplan
Brendan Kaplan
